Abdul Hasib

Full stack Developer

+880 1918-389189 | hasibadi22@gmail.com | Portfolio | GitHub
Mirpur, Dhaka, Bangladesh

Career Objective

Fullstack Developer skilled in Next.js, React, Typescript, PostgreSql and many other market demanding technologies. Experienced in building responsive UI, dynamic dashboards, authentication systems. Focused on solving backend problems, filling up security gaps, and contribute to a collaborative engineering team.

Skills

Expertise: Next.js, PostgreSql, Typescript, JavaScript, React.js, Prisma, Node, Express
Comfortable:, Redis, Passport, Tanstack Query, Redux, Zustand, Ofetch, zod, Tanstack Query
Tools: Git & GitHub, VS Code, Netlify, Vercel, Postman, cloudinary
Soft Skills: Teamwork, Communication, Time Management, Adaptability

Projects:

Edu-Matrix – (Sep 2026 – Oct 2026) Live | GitHub-client | Github-server

A full-stack education and institution-management platform that streamlines institution administration, department management, course offerings, teacher assignments, student enrollment, and course payments through a role-based system.

- **Academic Management:** Institution and department management, course creation, teacher assignments, and student enrollment workflows.
- **Authentication & Payments:** Otp based Email verification, Google OAuth sign-in, and Stripe Checkout integration for course payments.
- **Database Management & Validation:** Input validation with zod schema and scalable relationship between database tables.

Technologies Used: Next.js, TypeScript, Prisma, PostgreSQL, TanStack Query, Stripe, Tailwind CSS, Zod, TanStack Form.

Fix-it Now – (July 2026 – Aug 2026) Live | GitHub-client | Github-server

A full-stack home-service marketplace that connects customers with local technicians, enabling service discovery, technician booking, and payment workflows through dedicated Dashboards

- **Role-Based System:** Separate experiences for customers, technicians, and admins with protected access.
- **Service & Booking Management:** Service browsing, booking creation and tracking, cancellation, and review workflows.
- **Authentication & Validation:** JWT-based authentication using HTTP-only cookies, with React Hook Form and Zod for form handling,validation and secure password storing.

Technologies Used: Next.js, TypeScript, PostgreSQL, Prisma, shadcn/ui, React Hook Form, Zod, JWT.

Swift-Tix –(Dec 2025) Live | GitHub-client | Github-server

A full-stack MERN application that enables users to discover, book, and pay for travel tickets (Bus, Train, Launch, Plane) through a secure, role-based system.
● Ticket Booking & Payments: Real-time booking flow with status management and Stripe payment integration.
● Vendor & Admin Control: Ticket approval system, booking request handling, revenue insights, and homepage advertisement management.
Technology Used: React, React Router, Tailwind CSS, TanStack Query, Node.js, Express.js, MongoDB, Firebase Authentication, JWT, Stripe, Axios

Education & Certification

Complete Web Development With Programming Hero 2025 — view-certificate
